preprogrammings!

W White A Almond S Silver

Programming at your fingertips!

The **STE402P** programmable electronic thermostat can be used to control electric heating units with or without fans and a capacity up to 4000 W. It has an easy user interface and can manage up to 4 programming periods a day. Thanks to its programming mode, you can leave home with peace of mind. Moreover, you can lock the thermostat at a maximum temperature set point, which is very useful, especially when you have kids.

- Accurate temperature control to ensure increased comfort and energy savings.
- Buttons which allow to easily choose the desired preprogramming.
- It is possible to program 4 periods a day.
- Load from 300 W to 4000 W (240 V).
- Anticipated start: the thermostat reaches the desired temperature at the requested hour.
- Compatible with forced-air units.
- Frost-free warning and Off position.
- Lock option at a maximum temperature set point.
- Protection against power failure (2 hours).
- The temperature can be displayed either in degrees Celsius or Fahrenheit.
- Made in Canada.

Features

Colour White, almond or silver	Accuracy ± 0.15°C (± 0.27°F)
Manufacturing This product is CSA certified ensuring that it keeps the temperature of the room at the requested set point with a high degree of accuracy.	Temperature range Between 3°C and 30°C (37°F to 86°F)
Wattage & voltage See the selection table.	Warranty 3 years
